Subject: NEW PUBLIC COMMENT--PHASE 1--BUTTE HEALTH STUDY--ADDITIONAL SERIOUS METHODOLOGY AND COMMUNITY INVOLVEMENT ISSUES

Please see **ATTACHED** document for new public comment submitted during and as part of the public comment period on Phase 1 of the Butte Health Study.

Since the EPA has "back-tracked" on its promise of an independent peer review of Phase 1 of the Health Study, I thought that I would compare the methodology used in Phase 1 with the methodology recommended by leading experts in the field. Doing so clearly shows the inadequacy of the methodology used in Phase 1.

I also have raised new issues regarding community involvement, or the lack thereof, in the development of Phase 1 of the Butte Health Study.

Dr. John W. Ray
